

ADVANCED LIGHTING & CONTROLS

for Convenience Store and Petroleum Applications

The Image Company

CONTROLLED LIGHTING

Puts You in Control

IECC, Title 24 and ASHRAE Codes now require virtually every commercial building – regardless of size – to employ LED lighting and controls as a primary strategy to eliminate waste and save energy.

For convenience stores and petroleum establishments, this creates both a challenge and an opportunity to achieve code compliance as an investment that yields tangible advantages and benefits.

LSI has provided high-quality, energy-saving controlled lighting solutions to the convenience and petroleum industry for over 4 decades.

Controlled Lighting Solutions for Commercial Building Energy Code Requirements

LSI Controls offers a wide range of advanced solutions – wired and wireless – for outdoor and indoor lighting applications in C-Store ecosystems, including: outdoor area lighting, canopy lighting, interior ambient lighting, interior accent lighting and sign lighting. Ensure customers have the best possible shopping experience with quality code-compliant LED lighting.

A OUTDOOR AREA LIGHTING

Area lighting welcomes consumers, giving them a sense of safety and security. Lights can be automatically switched off or dimmed whenever sufficient daylighting is available, saving energy and costs.

B CANOPY LIGHTING

Proper canopy, façade and landscape lighting attracts attention and provides security. LSI controls can help you meet more stringent code requirements by automatically adjusting the light levels when the fuel station is vacant.

C INDOOR LIGHTING

Interior luminaires utilize daylighting technology which automatically adjust the emitted light levels to reduce energy consumption and cost. For rooms that aren't exposed to an external light source, occupancy sensors can help ensure energy is conserved when the room is vacant.

D LED SIGNAGE

Automatically control outdoor signs to turn off during daylight hours and operate at reduced lighting levels during night hours. Achieve brilliant lighting at reduced energy consumption with LEDs.

* Reduce energy cost while meeting code requirements with LSI Controls!

Advanced and Innovative Image Solutions for the C-Store Industry.

- Achieve Energy Code Compliance
- Save Energy Usage and Costs
- Extend the Life of Luminaires
- Enhance Lighting Quality
- Increase Occupant and Visitor Safety
- Improve Worker Productivity and Satisfaction
